- Blended learning approach, text and AV sessions, virtual field trips, assignments, interactive exercises, and scenario based learning.
- Credits assigned by CMA for successful completion of each course.

Swift reviews of basics  
 Practical, case-based content  
 Surveillance, screening and wellness focus

Curated sessions and virtual visits  
 Flexible schedules, easy access

The screenshot displays the Medisys platform interface for a course titled "Precision Diabetes in India Where We are Today". The interface includes a sidebar with "Topics and subtopics" such as "Introduction", "Six Components of Precision Medicine", and "Practice Precision Medicine: Patient-centric Approach". The main content area features a two-column format with text and illustrations, including a diagram of the "FCDM" (Family Medicine Curriculum Framework) and a "Detailed" lesson option. The bottom navigation bar includes icons for Home, Navigation, Live sessions, Group meetings, Detailed lesson or concise version, and AI tutor. The right sidebar shows a "Syllabus" section with "COURSE ANALYTICS" and a list of chapters, including "Section 1: Epidemiology" and "Textbooks".

## Comprehensive digital educational platform for a training of those seeking entry level position in the health sector
